COMPANY PROFILE

Since 1999, RSSW Bathroom is a Foshan,GD based manufacturer of reliable luxury bathroom fixtures such as bathroom furniture, Steam showers, Whirlpool bathtubs, Stainless steel shower panel, Acrylic Bathtub, Shower cubicle and Shower tray. Our mission: to provide outstanding bathroom products that our customers love for their reliability, functionality, and style.

There are a number of reasons why we think RSSW is the best luxury bathroom manufacturer in the world. Our Bathroom Furniture is manufactured with a High-density waterproof oak and all of our shower, steam rooms, and whirlpool bathtubs are manufactured with a unique form of superior acrylic that you can not find on any of competitors products. All of our products are built from the ground up for reliability. Once our products are manufactured, we provide more quality assurance than anyone else in the industry. Each unit is individually tested and hand inspected before leaving the factory . We are so confident in the reliability of our products that we offer a 5 year warranty on everything we sell. Thus our products are to the environment healthy for the mind and body.

Before we start our product design, our engineers and product design staff think about features and designs they would like applying in their own bathrooms. Once we have an idea of the functionality, features, and styles we are looking for creation, our professional artists and engineers design products that are functional, stylish, and most of all, reliable. When you purchase a bathroom fixture from RSSW, you can expect to walk into your bathroom in 15 years and find the product working just like the day begin. Our friendly technical support staff is available by telephone or e-mail every business day.

If you are thinking about a custom bathroom remodel, please contact us for advice, ideas, and product information. When it comes time to sell your house, our luxurious bathroom fixtures add considerable value. In fact, our studies have shown that remodeling a bathroom with RSSW products adds twice the value to the home as the remodel costs itself. Our custom bathroom design experts are friendly, knowledgeable, and willing to help.

Our products are CE and ISO approved, and complied with UL Certification for individual components.

Water Emotions

RSSW interprets technology and design to create intense emotions of daily well-being. sensations made of water and air, natural elements at the origin of life as well as ancient symbols of purity to be rediscovered.

THE SENSORIAL UNIVERSE OF OUR PRODUCTS

Water and air, natural elements at the origin of life and ancient symbols of purity, are the primary factors that RSSW technology and design interpret to create intense emotions of daily well-being.

Emotions guided by the harmony and refinement of RSSW hydromassage tubs and showers, designs that result from the pursuit of a single objective: the happiness of people who, like you, will make them the star feature in their own bathroom.

Maximum attention to looks therefore, but also the intent to provide you with well-being during intense moments of physical and mental via the different hydromassage functions.

Specific programmes that are different, yet at the same time complementary, are developed by combining expert technical skills with the ability to interpret the requirements of each individual. On order to enjoy daily moments of relaxation with a focus on vitality and pleasure.

No matter what kind of hydromassage, RSSW will be your own personal choice.

HEALTH MADE OF WATER

Water is a natural, extremely beneficial element, already appreciated by the most ancient fields of oriental medicine.

HYDROMASSAGE THAT TAKES CARE OF YOU.

As natural, extremely beneficial element, Water is already appreciated by the most ancient fields of oriental medicine.

Thanks to research and latest generation technology, hydromassage tubs and showers have become the mainstay of truly effective hydrotherapy treatments.

Hydromassage, as a main or auxiliary therapy, has numerous effects on the entire organism:

- Promotes the blood circulation and interstitial fluids from the body's extremities;
- Purifies tissues;
- Reduces painful reactions by stimulating the nerve receptors in the skin.

There are so many benefits, around all parts of your body such as skin, circulation, muscle tone, breathing and so on; Every aspect feels the benefit of this water treatment that has sensational powers.

EACH TO HIS OWN

Taking a bath is a moment for switching off, relaxing, and the opportunity for a well-being session. to be selected and enjoyed to the full.

CHOOSE YOUR IDEAL HYDROMASSAGE, WITH RSSW

●Stimulating bath

A bath for intense stimulation of the lymph system, will act on and improves surface and deep circulation.

A temperature of around 37°C is suitable for people suffering from venous disorders because the moderate warmth of the water prevents dilation of the blood vessels, which is the main cause of circulation problems.

※Time of day: morning or afternoon, 2-3 times a week.

※Duration: 20 minutes.

※Effect: vasoconstricting, relaxing and calming.

●Relaxing bath

When muscles are in a state of contraction that does not seem to be improving, hydromassage encourages the process of relaxation and eases tension. The water, which should be hotter for thin people and not exceed 40°C, raises the surface temperature of the body, and improve the overall functionality of the blood and lymph systems. To obtain maximum benefit, the jet outlets must be directed towards the tense areas, keeping the jet pressure at minimum.

※Time of day: morning or evening.

※Duration: 15-20 minutes.

※Effect: relaxing, vasodilating.

●Anti-insomnia bath

Hectic lifestyles cause tensions that continue even when relaxing, especially at night.

Choosing to immerse yourself in the hydromassage tub, with immediate relaxation and easing of all muscles, is the best solution for beating insomnia or simply inducing rest. The important thing is careful positioning of the jet outlets at minimum pressure.

※Time of day: at night, just before time for bed.

※Duration: 15 minutes.

※Effect: easing of muscular tension and mental relaxation.

●Anti-cellulite bath

Cellulite is the result of poor circulation in the smaller blood vessels. Hydromassage can provide an effective stimulating action with results that are both immediate - relaxing the legs and making them feel lighter and long-term helping to relieve the problems of unsightliness associated with cellulite.

※Time of day: any time of day, 2-3 times a week.

※Duration: 20-30 minutes.

※Effect: stimulates proper circulation.

●Anti-stress bath

When you feel high stressed, this hydromassage bath will help to re-establish the right physical and mental balance to regain a bit of peace and calm. The tepid water in fact has a powerful relaxing effect on the muscles, which helps you to tackle the working day or induce sleep.

※Time of day: morning or evening, before dinner.

※Duration: 20 minutes.

※Effect: easing of muscular tension and mental relaxation.

●Therapeutic bath: arthrosis

Hydromassage is a true panacea for arthrosis. Stimulating the blood circulation in fact reduces pain in the bones and joints, while the warmth of the water, combined with micro-massage directed to the affected parts, reduces joint stiffness and numbness in the muscles.

※Time of day: morning or afternoon, 2-3 times a week.

※Duration: 20-30 minutes.

※Effect: stimulates the blood circulation, reduces pain in the bones, reduces stiffness in the joints

A PLEASURABLE BATHING EXPERIENCE

TIPS FOR HYDROMASSAGE AS IT SHOULD BE

You've had a hard day. You want to relax, wash away all your problems and annoyance. You've decided to have a relaxing bath and you don't want anything to spoil your small corner of paradise.

Check the control console

The control console or the remote control are used to correctly set the hydromassage session. You will find them on the side of your RSSW tub, in either digital or pneumatic version.

You won't go wrong for each function. You can switch the hydromassage on or off, adjust the intensity of the flow, mix the hot and cold water and, naturally, select different systems, at the touch of a button.

Prepare to immerse yourself

Have a quick shower before abandoning yourself to the pleasure of hydromassage and make sure that all the jets outlets are fully open and pointing in the right direction. Don't forget that the air intake spout, which is extremely important because it regulates the mixture of water and air for hydromassage, Be free to perform its function without any obstacles or obstructions. Select the water temperature and pressure, fill the tub and start the hydromassage system.

It's now time to immerse yourself in pleasure.

Relaxation the right way

Don't use detergents or additives that create foam. Choose natural essential oils and precious substances for their healthy and therapeutic properties.

CARE-FREE CLEANING

TO INCREASE THE VALUE OF YOUR HYDROMASSAGE OVER TIME.

Forget the old-style tubs, keeping RSSW hydromassage tub clean is fast and easy, in short time.

There are three main operations which, both keeping the product looking good and keeping your model in perfect working order.

※**Daily Clean:** to be done after using the tub.

Use a non-corrosive liquid detergent specifically for delicate surfaces. Simply rinse with plenty of water.

※**Weekly Clean:** for more thorough cleansing.

After having washed the tub with liquid detergent, dry it with a soft cloth which will help to remove all types of residue. For more radical cleaning, simply use classic cleaning products which contain no alcohols or ammonia, generally used for cleaning smooth surfaces in the home.

To remove lime scale, use traditional methods: rub the tub with a soft cloth soaked in lemon juice or vinegar.

※**Hydraulic Clean:** for in-depth cleaning of the tub, right down to the pipes and jet outlets.

In extra hard water areas especially, the hydromassage tub system must be periodically subjected to in-depth cleaning to remove lime scale residue from the pipes and jet outlets.

INSTRUCTIONS ON HOW TO IMMERSE YOURSELF IN WELL-BEING.

●Temperature

Adjusting the temperature for hydromassage is fundamental to the success of the treatment. It's advisable to exceed normal body temperature by only a little and warm the water to about 37° C .

●Duration

The immersion time is directly dependent upon the benefits you want to obtain. Remember that staying in the water for too long can lead to excessive relaxation of the muscles or a drop in blood pressure.

For your first few sessions, the ideal duration is about 10 minutes. The maximum massaging time by the water should, in any case, not exceed 20 minutes.

●Time of day

Immersing yourself in the hydromassage tub will become a temptation you should give in to on a regular basis. Whatever time of day you choose, make sure to wait for at least two hours after main meals.

●Post-massage phase

Once your hydromassage has ended, forget the rest of the world.

Give yourself 5-10 minutes of relaxation in the bathroom to increase your well-being and the effectiveness of the treatment.

The Whirlpool bathtub is designed according to ergonomic concept and the hydraulic massage Jets are reasonably distributed in different positions , so that your body and mind can enjoy the greatest comfort and relaxation.

Inspired by you and targeted where it matters most .
In synergy with the powerful hydromassage pump , releasing a mixture of air and water which is highly effective on the vital points of the body.The hydraulic massage Jets are inclined at 50~60 and adjustable in any direction, They hit all the muscle groups of the body in the correct direction .The plantar and lateral jets stimulate the whole body , eliminating fatigue and tension ,while the rotating dorsal microjets massage the entire back .

HYDROMASSAGE

The skin also wants to be involved
In order to being extremely pleasant and gentle on the body ,the blowing of air contributes to the oxygenation of the water ,revitalising skin cells and promoting the radiance of the skin .

AIR BUBBLE MASSAGE

SHOULDERS

The build-up of tension in your shoulders, often leave you the feeling of discomfort and muscle stiffness. The installed at the upper part of the baths ,work specifically on these muscles ,relaxing them ,and releasing fatigue and tension .

BACK

Sitting in the same position for a long time at work ,carrying loads ,fatigue or walking too much ,can create back pains which can be strong and accumulate stress that also affects posture .
The rotating lumbar jets and in particular inspired by shiatsu massage apply a constant and continuous pressure in this very important area of the body ,relaxing, toning and relieving pain .

LOINS

All the pressure ,which is sometimes unbearable ,accumulating on a daily basis in the lower part of the pelvis is alleviated and released in the water due to the action of a single large jet positioned in the centre of the hydromassage bath,where providing immediate relief and rest .

HIPS-THIGHS - KNEES

This area of the body is very important for circulation. To the fact of our daily posture such as often working sat down for long periods , slows the circulation , creating tension and swelling , Whirlpool Bathtub has positioned the jets at just the right height to stimulate the circulation of blood and relieve discomfort .

LEGS - FEET

It is difficult to imagine the levels of stress ,load and tension our feet , ankles and calves are subjected to every day .Every step ,every flight of stairs ,all the loads we carry ,put pressure on those body parts above.
Moreover ,the soles of the feet are connected, by extension ,to the entire body .The two positioned at the height of the feet ,not only restore strength and relieve fatigue , but also reactivate the blood flow and stimulate a beneficial flow of energy throughout the body.

Detroit's diverse culture has had both local and international influence, particularly in music, with the city giving rise to the genres of Motown and techno, and playing an important role in the development of jazz, hip-hop, rock, and punk music. The erstwhile rapid growth of Detroit left a globally unique stock of architectural monuments and historic places, and since the 2000s conservation efforts managed to save many architectural pieces and allowed several large-scale revitalizations, including the restoration of several historic theatres and entertainment venues, high-rise renovations, new sports stadiums, and a riverfront revitalization project. More recently, the population of Downtown Detroit, Midtown Detroit, and various other neighborhoods has increased. An increasingly popular tourist destination, Detroit receives 19 million visitors per year. In 2015, Detroit was named a "City of Design" by UNESCO, the first U.S. city to receive that designation.

A large, white, corner whirlpool bathtub is the central focus, set on a wooden deck. The tub features two black reclining seats, a central control panel, and a showerhead. The background shows a city skyline at night, with a prominent Ferris wheel (London Eye) visible. A potted plant with red flowers sits on the deck to the left of the tub.

Milan series >>>

Milan is the second largest city of Italy, located in the plains of Lombardy. It is the capital in the Province of Milan, as well as the regional capital of Lombardy. The city proper has a population of about 1.3 million, while the population of the urban area is estimated by Eurostat to be 3.08 million. The Milan metropolitan area, by far the largest in Italy, is estimated by OECD to have a population of 7.4 million.

Milan is renowned as one of the world capitals of design and fashion. The English word millinery, referring to women's hats, is derived from the name of the city. The Lombard metropolis is famous for its fashion houses and shops and the Galleria Vittorio Emanuele in the Piazza Duomo. The city hosted the World Exposition in 1906 and will host the Universal Expo in 2015. Inhabitants of Milan are referred to as "Milanese"

What is a Steam bath?

A distant relative of the ancient Roman baths and a fundamental practice for well-being of the Arabs and Turks, the Steam bath is a hot steam bath that can be taken at various degrees of temperature and humidity, an interlude of warmth to be followed by a rinse in cold water to revitalize the body and mind.

The Steam bath, useful for people with dry skin, should not be confused with the sauna, a much drier environment and suitable for people who sweat easily.

● **Goodbye to the common cold**

Unlike the sauna, which is not recommended in the case of colds and flue, the Steam bath can be a real aid to recovery. The humid warmth in fact helps to clear the airways and is an excellent aid in treating respiratory system disorders. The important thing is to restrict the time of exposure to steam, avoid rinsing with cold water and, if possible, go to bed after the treatment. The reaction to the heat and sweating will help you to eliminate toxins and return to good health.

You can have a Steam bath on several days running, while avoid it when weakened by a severe bout of flu.

● **Pure steam, pure well-being**

Let yourself go in a cloud of steam means giving your body more warmth, at the same time ensuring purification of the inner organism. The humidity and temperature of the Steam bath in fact stimulates intense sweating, resulting in deep cleansing of the skin which is freed of all its surface impurities, eliminating dullness and signs of tiredness.

● **More energetic and better protected**

The high temperature that is a feature of a Steam bath improves the metabolism, speeds it up and makes it easier to slim. It also has a revitalizing power that stimulates the body by infusing new energy. This beneficial effect also extends to the lymph and immune systems, increasing their reaction and defence capabilities.

Taking a Steam bath is no longer just an interlude of well-being to be enjoyed in your own bathroom, but becomes a habit to safeguard your health and reduce the risk of exposure to illnesses.

● **Like refreshing summer rain**

In all RSSW shower cubicles equipped with a Steam bath, the embrace of steam is followed by a jet of cool water that refreshes the skin and boosts the blood circulation.

The hot steam is in fact able to dilate the blood vessels in the skin with a relaxing and soothing action, while the cold shower stimulates the blood vessels under the skin and improves deep circulation, significantly reducing unsightly blemishes such as cellulite.

Cold water and steam are also effective against sagging tissue and have a positive effect on the nerve centres in the spine, improving muscular response and strength.

THE EXCITEMENT OF THE RINSE ON YOUR SKIN

You've abandoned yourself to the pleasure of the steam.

You've chosen to stimulate your circulation by massaging it with a horsehair glove and now, purify your skin with a pumice stone. You're ready to rediscover the advantages of running water.

The shower that accompanied the Steam bath is like a regenerating waterfall that transmits energy to the entire body. A light shower of rain, of which the temperature and duration you can adjust according to the effect you want to achieve.

There are many possibilities and above all benefits that you can obtain:

- Purifying effect, with a cold shower between 15-25°C lasting one minute
- Soothing effect, with a warm shower between 32-36°C for 6-7 minutes
- Anti-fatigue effect, with a hot shower between 38-40°C for a maximum of 4 minutes

Once you finish rinsing, snuggle into a soft dressing gown and lie down to perceive, little by little, the sensation of being reborn, You'll probably continue to sweat, cause the steam bath has effects that persist, even after the end of a session. That's why it's important to replace the mineral salts lost by drinking a lot: water, herb teas, fresh vegetable and fruit juices It will be the best ending for your beauty treatment.

LIGHT OF LIFE-BENEFITS FROM FAR INFRARED RAY

※ Increase Body Oxygen And Defer Senility

Far infrared ray can make water molecules to produce resonance, improve the oxygen content of the body, restore vitality, make spirit more smooth, more flexible, improve the disease resistance, Anti-aging.

※ Balance The PH

Far infrared ray can purify blood, recover skin, prevent bone joint pain due to excessive uric acid.

※ Improve Microcirculation System

Let water molecules shuttle among body cells, make resonance and transform into heat energy, raise body temperature , support blood circulation and dispels stress.

※ Promote Metabolism

Microcirculation metabolism, can make the waste of human body, such as heavy metals cause cancer, lactic acid cause fatigue and aging, ion, lead to high blood pressure axis or pain caused by uric acid,ect. quickly out of the body, reduce the burden of liver and kidney.
